Custom-Engineered Metal Buildings

Red Dot specializes in complex, custom-engineered metal building projects. Our signature commitment to quality and service has marked projects both big and small for over 60 years. Combining state-of-the-art design, engineering, manufacturing, and construction services, Red Dot has the necessary expertise and sophistication to be your single-source supplier on future building projects.

Flour Bluff ISD Natatorium

Hybrid Steel Buildings

Red Dot is an industry leader in Class "A" structural steel fabrication. Our success begins with a full-circle commitment to quality and service. Along with our IAS AC-472 pre-engineered metal building certification, we also hold the industry-required AISC certification which allows Red Dot to offer the complete design, fabrication, and erection of your low-rise hybrid buildings. All Red Dot welders and fitters are qualified and in compliance with AWS D1.1 and D1.3 codes of welded construction. In addition, Red Dot also has AWS-certified welding inspectors on staff.

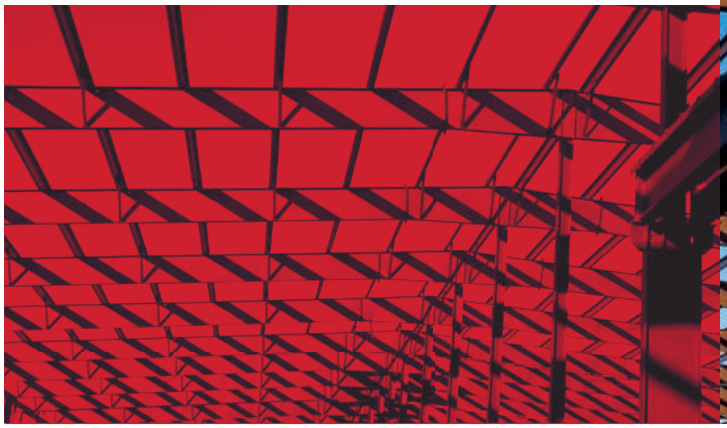
Red Dot Furnish And Erect Services

Full-Circle Commitment For Any Building Project

For over 60 years, Red Dot has proudly offered single-source solutions for your metal building needs – including engineering, manufacturing, and construction departments all under one roof. This way, our customers can rely on Red Dot's product and service excellence from beginning to end.



Why Choose Red Dot Construction Services?

- Single building contract improves efficiency of project management and allows for greater quality assurance and scheduling control.
- On-site inspections and problem-solving by Red Dot Construction Managers and Field Technicians.
- Stringent safety requirements and guidelines.
- Payment and Performance bonding as needed.
- Award-winning member of MBCEA (Metal Building Contractors and Erectors Association), one of the leading organizations supporting professional advancement and development within the metal building industry.
